Bio cultivator 3 tine ash handle 140mm

This three prong is one of the most useful garden tools to have. Ideal for cultivating and loosening the soil in the border, vegetable garden and also on the flower boxes on your balcony. Our organic garden tools are made from one piece of hardened boron steel. Due to the strength of the material, they are extra light in weight but have the strength of the large, heavy versions. Bio tools are made entirely with solar energy, making them the most sustainable tools we produce in the Netherlands.
