## Bulbplanter with 2 ash handles 750mm

We call it a bulbplanter but it is really good to plant loads of perennials and annuals. It doesn't take a lot of skills to plant 300 pieces per hour. A nice way to create holes for plants and bulbs by standing up with a straight back. It's made of the blades of two planting trowels that dig a hole together. The hinge between the blades can be used as a step to push the blades in the soil. Once you have the blades in the dirt deep enough you close the hinge and pull it up. You digged the hole.

### Specificaties

Item nr	Omschrijving	Gewicht	Formaat	Handgreep
020510	Bandhamer met langesteel en nylon koppen	1,90	300x190x190
