Crown trowel ash handle 140mm

Designed for the Chelsea Flower show. We needed a touch of the Dutch and that's is how the tulip trowel was created. It is more than just a shape. The curved shape of the blade makes in combination with the great cutting edge a nice round planthole. The edge are sharpened like a razorblade, this trowel digs trough any kind of soil. Finished in original DeWit design with a Ash handgrip.
