Cultivator 3 tine ash handle 1400mm

This handy cultivator has 3 curved short tines with which you can cultivate the garden and border perfectly. Cultivating regularly will prevent the soil from becoming too dense and preventing nutrients and water from reaching the roots of the plants. The cultivator's teeth open the soil enough to stimulate the growth of plants and flowers. This cultivator is equipped with a 1400mm long ash stem that gives you a large reach in the borders.
