Cultivator 5 tine ash handle 1400mm

Cultivating in the garden is done to loosen the soil and improve the aeration in your garden. Better aeration ensures better growth of flowers and plants. A rain shower is good for the garden, but also causes the soil to become dense. Regular cultivation will give you better growth in your garden. This is not only important in the flower garden, cultivation is also important in the allotment or vegetable garden.

The Wit® cultivators are made in different designs, with 1, 3 or 5 teeth. The space in the garden or border usually determines which cultivator you want to use. The sharp and expertly bent teeth are welded together to form an indestructible tiller. The teeth are made of hard steel, which guarantees a long lifespan. The ash wood handle is expertly glued to the cultivator. The 5 tines are good for cultivating the soil, but larger pieces of weed can also be raked nicely from the border.

Specificaties

Item nr	Omschrijving	Gewicht	Formaat	Handgreep
020510	Bandhamer met langesteel en nylon koppen	1,90	300x190x190
