DeWit® Trowel small with V cut and ash grip

This new DeWit trowel has a regular blade that's made with the V-cut edge. It's give you extra benefits by digging, dividing and planting in rooted areas in the Border. The edge is sharp like a razor blade and cuts easily trough roots and hard soil like clay. The cutting edge of a trowel make the different, Once you felt the difference between a trowel and a DeWit made trowel you know why you want it. Made in Holland from the best Swedish boron steel and comes with an Ash handgrip. Sustainable made, durable and guaranteed a lifetime.
