# Japanese handhoe left handed ash handle 140mm

Looking for gardening tools for left-handed gardening enthusiasts? The Japanese hand chop is ideal for removing or weeding weeds in your garden. The ergonomic shape allows you to get into most corners of your garden, close to the plants to loosen the weeds and remove them from the garden or border. If you regularly weed your weeds, there will be more space and energy left for your flowers and plants, which will grow and bloom even better as a result.
