Pavestone hammer 55mm wooden handle

The original Dutch pave hammer. The unique combination of hammer and chisel. This 1,7 kilogram is made with a 55mm wide chisel which is used to cut brick on the side you need them. The hammer is forged from high quality steel and hardened. The user of these products always need to protect eyes with glasses and skin with proper working clothing and gloves. The mainroads are build with automatic paving equipment, the corners and edges are mostly done by hand and pave hammer.
